

Foodwaste collection container

How do you get started?

How it works...

- Fill your 5-gallon bucket with food scraps.
- Place your bucket outside the door on your pickup day.
- Sit back, relax, and pat yourself on the back for being a good human!

Who We Are

About Us

South Hill Compost is a residential and commercial food scrap pickup service operating in Greater Cortland, Homer, and McGraw. We compost on site and offer compost and worm castings made from these food scraps.

SOUTH HILL COMPOST

*Sustainability –
Starts With You.*

Wheeled toter for larger collection services.

What is food waste collection?

It all starts with you...

By collecting food waste from you, we can divert nutrients to beneficial uses like compost. This helps to reduce the amount of food waste going to landfills, leading to a more sustainable future.

Think Food Waste Collection needs to be difficult?

Think again!!! Once your container is delivered, all you have to do is place your food waste into it and we take care of the rest. We will empty your container and return a clean one on your next collection day.

“A nation that destroys its soils destroys itself.”

— Franklin D. Roosevelt

What can go in your bin?

Anything that was recently alive can be composted. This includes meat and dairy products. Visit our web site for a complete list.

Why should you compost?

Composting reduces waste, makes us less dependent on landfills, and decreases greenhouse gas emissions.

Food waste – destined for composting.

Individual care for collection and single batch composting. Small enough care, big enough to make a difference.
